FOR IMMEDIATE RELEASE

SCIENCE FOR PRESCHOOLERS:

Budding Biologist is a fun and scientifically accurate children's book series

Science jobs are the foundation of America's economic future, so why are we reading scientifically inaccurate books to our young children? Budding Biologist aims to change the way we expose young children to science by providing scientifically accurate and beautifully engaging books for our early and pre-readers. A new, female-owned company, Budding Biologist has published its first book: *Am I an Insect?* In addition to discussing characteristics of insects, this book also teaches children to think analytically, arguably the most important skill in science, by posing questions that encourage readers to create informal hypotheses about their observations.

Is a spider an insect?

No. All insects have 6 legs.
How many legs does a spider have?

This type of book is an important building block for our children's future, and you can help us open young minds to science.

If you would like more information about the topic or to schedule an interview with Budding Biologist founders, please call Kris Duehl at 919-621-5725 or email BuddingBiologist@gmail.com
